Kigali, Rwanda

SUMMARY

Information Technology graduate from the University of Rwanda with practical experience in systems administration, networking, cybersecurity, and backend software development. Experienced in working with IT infrastructure, server administration, and developing software solutions through professional training and hands-on projects. Eager to apply technical skills, strengthen expertise, and contribute to solving real-world problems in a collaborative, technology-driven environment.

WORK EXPERIENCE

Django Developer Trainee, SOLVIT Africa 07/2026 – 10/2026 | Kigali, Rwanda
• Building web applications with Django, covering models, ORM, authentication, forms, CRUD operations, and file uploads.
• Developing RESTful APIs using Django REST Framework, including serializers, CRUD operations, JWT authentication, permissions, pagination, filtering, and searching.
• Learning Machine Learning with NumPy, Pandas, Matplotlib, and Scikit-learn, including regression, classification, model evaluation, feature engineering, and hyperparameter tuning.
• Learning application deployment and DevOps practices including PostgreSQL, Gunicorn, NGINX, Docker, and Docker Compose, with a final capstone integrating Django, REST APIs, and a Machine Learning model.

IT Infrastructure intern, National Bank of Rwanda (BNR) 03/2025 – 06/2025
- Collaborated with the IT teams to troubleshoot system and network issues
- Gained exposure to enterprise networking and IT security practices
- Gained experience in systems administration, virtualization and DevOps

Head of IT department - student level, University of Rwanda 07/2023 – Present
- Served as a liaison between IT students, faculty, and administration
- Coordinated with class representatives to support academic planning and program delivery
- Assisted students with academic guidance and professional opportunities
- Contributed to departmental coordination to ensure timely delivery of course modules

Youth Volunteer, City of Kigali 11/2021 – 03/2022
- Conducted community awareness sessions on COVID-19 transmission, prevention, and public health guidelines
- Provided basic guidance and support to community members regarding health and safety measures
- Supported Rwanda National Police and government agencies in enforcing COVID-19 regulations.
- Assisted in COVID-19 vaccination activities

EDUCATIONAL BACKGROUND

BSc. Information Technology, University of Rwanda 05/2022 – 05/2026 | Kigali, Rwanda
Relevant coursework: Computer Programming C, Database Systems, Information Systems Security, Interactive Web Development, Advanced Computer Programming in C++, Mobile Application Development, Data Communication and Networking, and Software Engineering.

High School Diploma, GS Remera Rukoma 01/2018 – 07/2021 | Kamonyi, Rwanda
Relevant Coursework: Computer programming in different languages, mathematics and physics

Certifications and Training

- Network technician career path - CISCO
- Junior cybersecurity analyst career path - CISCO
- Linux fundamentals - TheLinuxFoundation
- Practical help desk - TCM security
- MITRE ATT&CK framework - Antisyphon Training
- Active defense and cyber deception - Antisyphon

SKILLS

Programming Languages:
Python, Java, Dart, JavaScript

Frameworks & Technologies:
HTML, CSS, Django, Flutter, React, Next.js, Node.js

Databases:
PostgreSQL, MySQL

Systems & Networking:
Linux, Networking, Virtualization

DevOps & Cloud:
Git, Docker, Jenkins, Terraform

Security:
Ethical Hacking Basics, IT Security Fundamentals

Soft skills:
Communication, leadership, teamwork, adaptability, time management, decision-making

LANGUAGES

Kinyarwanda
Native

English
Advanced

German
Intermediate

French
Beginner

ACADEMIC INTERESTS

- Software development
- Networking
- Cybersecurity

Awards

Peace maker, Remera Rukoma High School 30/06/2021
